

ANSHIKA YADAV

B.Tech candidate specializing in full-stack development and SQL analytics with experience building scalable REST APIs and data-driven projects.

anshiyadav2614@gmail.com | +91 6396643449 | Bareilly, Uttar Pradesh, India | [LinkedIn](#) | [GitHub](#)

EDUCATION

B.Tech, Computer Science & Engineering — Shri Ram Murti Smarak College of Engineering & Technology, Bareilly September 2023 – Present (Expected 2027)

- CGPA: 7.37 / 10

Higher Secondary (CBSE) — Radha Madhav Public School, Bareilly 2023

Secondary (CBSE) — Radha Madhav Public School, Bareilly 2021

WORK EXPERIENCE

Data Science Intern — Outrix 15 Nov 2025 – 15 Dec 2025 (1 Month)

- Engineered a customer segmentation pipeline using K-means clustering, automating data preprocessing and model inference to support real-time marketing decision-making.
- Visualized customer clusters using scatter plots to communicate segment differences to non-technical stakeholders.

Technologies: Python, Scikit-learn, Seaborn

PROJECTS

Movie Review Platform github.com/anshika-026/MovieReviewPlatform

- Integrated TMDb API to handle 500+ daily asynchronous requests, reducing content load time by 20% through optimized JSON parsing.
- Engineered a RESTful backend using Node.js and Express.js, implementing robust CRUD operations and unit testing to ensure 95% code coverage for core API endpoints.
- Leveraged MongoDB Atlas to architect a scalable NoSQL schema, reducing query latency for 1,000+ user reviews via strategic indexing.

Technologies: Node.js, Express.js, MongoDB Atlas, JavaScript, TMDb API, GitHub

Flix45: SQL Analytics github.com/anshika-026/Flix45-SQL-Analytics

- Designed a PostgreSQL star-schema database, modeling a Netflix-style streaming platform across 10+ interrelated tables spanning users, subscriptions, content, and viewing activity.
- Architected complex window functions and CTEs across 10+ business-driven SQL queries covering genre trends, completion rates, revenue breakdown, and churn prediction.
- Identified that premium subscribers generate 48% of total revenue despite representing only 37% of the user base, an insight used to inform targeted retention strategy.

Technologies: PostgreSQL, Power BI, VS Code, GitHub

NexLearn: AI Tutor github.com/anshika-026/NexLearn

- Developed a GenAI-powered tutor using Google Gemini API, implementing a custom session management layer to maintain state and context across multi-turn user interactions.
- Implemented multi-mode interaction (Ask, Quiz, Explain) with persistent chat history and a clean, user-friendly interface.

Technologies: Python, Google Gemini AI API, GitHub

TaskFlow: Task Management API github.com/anshika-026/Taskflow

- Engineered a high-performance RESTful Web API using ASP.NET Core and .NET 8, optimizing middleware for centralized logging and reducing request overhead by 15%.
- Connected the API to a SQL Server database using Entity Framework Core with code-first migrations.
- Achieved 100% endpoint documentation and testing coverage via Swagger, ensuring reliable integration for downstream consumers.

Technologies: C#, .NET 8, ASP.NET Core, Entity Framework Core, SQL Server, Swagger, GitHub

TECHNICAL SKILLS

Languages & Core Tech: Python, SQL, JavaScript, HTML, CSS, C++, C#, .NET

Database Management: SQL Server, PostgreSQL, MongoDB, MySQL

Frameworks: Node.js, Express.js, ASP.NET Core, Entity Framework Core

Developer Tools: VS Code, Git, GitHub

CERTIFICATIONS & TRAINING

- Full Stack Development — NoviTech R&D Pvt. Ltd, June 2026
- Data Analytics — NoviTech R&D Pvt. Ltd, January 2025
- Data Analytics Job Simulation — Deloitte, August 2024
- Ethical Considerations for Generative AI — IBM, September 2024
